TECHNICAL SKILLS

Frontend

JavaScript, TypeScript, React, Next.js, Remix, styled-components

Mobile

React Native, Redux Thunk, native modules, Android, iOS

Backend & platform

Node.js, Koa, REST APIs, WebSocket, MQTT, Docker

AI systems

LLM integration, MCP, Claude Code, agentic coding, AI-assisted end-to-end testing

Additional

Shopify embedded widgets, Git, Python reading and writing

PROFILE

Software engineer with over six years of experience across e-commerce SaaS, web applications, and React Native products. Builds frontend-led product experiences with React, Next.js, Remix, TypeScript, and Node.js. Refactored a Shopify storefront script from 750 KB to 35 KB and reduced load time from 3–5 seconds to 1 second.

Delivers generative-AI features and development systems: evaluated LLM output quality, validated a customer-data-to-marketing-report workflow, and built reusable agentic development practices for a product team.

SELECTED IMPACT

50%+

reduction in weekly user uninstallations after generative-AI onboarding

750 KB → 35 KB

storefront-script payload after refactoring

3–5 sec → 1 sec

storefront-script load time

RECENT EXPERIENCE

Software Engineer

奧雲科技股份有限公司

Apr 2022–Present

- Develop a Next.js e-commerce administration platform for a core product representing at least 70% of company revenue.
- Build React and JavaScript widget packages embedded in Shopify storefronts; reduced a storefront script from 750 KB to 35 KB and load time from 3–5 seconds to 1 second.
- Drove an AI marketing-report feature by comparing output quality across at least 6 LLMs, validating the customer-data-to-report workflow, and selecting a model.
- Redesigned product onboarding to introduce generative AI, reducing weekly user uninstallations by at least 50%.
- Introduced reusable agentic development practices and agent-driven automated end-to-end testing.
- Created a codebase knowledge system designed for AI consumption, lowering collaboration context costs.

SELECTED PROJECTS

cc-translate-proxy

A sidecar translation proxy that lets Claude Code communicate with Anthropic in English while users read and write in Traditional Chinese.

Shopify Convenience Store Pickup Integration

Apr 2022–Present

Provides convenience-store pickup integration for Shopify e-commerce sites.

Ako Loyalty & Retargeting Ads

Apr 2022–Present

An e-commerce system for advertising delivery and loyalty programs, including points and membership tiers.

EDUCATION

National Tsing Hua University
Computer Science
Undergraduate studies
Sep 2015–Jan 2020

LANGUAGES

English

Intermediate listening, speaking, reading, and writing

Taiwanese

Intermediate

EARLIER EXPERIENCE

Frontend Engineer

Apr 2021–Mar 2022

香港商領致有限公司台灣分公司

- Developed a React Native IoT application that controlled connected devices through MQTT.
- Built TypeScript and Next.js web applications and Node.js/Koa microservices for IoT devices.
- Used Docker to standardize development environments and deployment.

Frontend Engineer

Sep 2020–Mar 2021

雨圖數位行銷科技股份有限公司

- Developed a React Native and Redux Thunk POS system across Android and iOS phones and tablets.
- Implemented dark mode, theme colors, Chinese and English support, time zones, and currency settings.
- Integrated REST APIs and WebSocket-based communication.
- Built an internal administration system with React.

Frontend Engineer

Feb 2020–Aug 2020

小驢行股份有限公司

- Built Android and iOS applications with React Native and web applications with React and styled-components.
- Independently delivered a driver application for a dispatch system, including authentication, order acceptance, Google Maps navigation, electronic signatures, GPS reporting, and push notifications.
- Supported customized requirements for drivers across eight counties and cities, using CodePush for over-the-air updates; released through Google Play and the iOS App Store.
- Integrated the LINE SDK for in-app interaction with a LINE bot.
- Built a React Native native module connecting to an Android Bluetooth SDK for health-monitoring device data.
- Built a React administration system, a React Native order-taking application, and a React customer appointment site.
